

SAPC 9115
Copy 2 of 6

11 September 1956

Dear Bob:

This letter will confirm the information previously passed to you by telephone that we are in receipt of a requirement from AF (separate from any requirements associated with Sid and Russ of Dayton for an additional set of ground evaluation gear for System I tapes.

You will remember that in Amend no. 9, of A-101, we increased quantities of certain items by one each (E. 2. c., d. and f.) These items were the analysis playback, PRE indicator, and event marker. Subsequently, after June 30, 1956, we were asked to provide for the AF a second set of these equipments, which information was passed to you verbally.

Accordingly the next Amendment to A-101 will modify E. 2. c., d., and f. to provide for an additional item of each of these categories of equipment and you should proceed accordingly in your procurement plans.

This requirement is independent of course, of Ground Duping and Analysis equipment which will be ordered by the Follow On Group for their 20 System No. 1 and 20 Systems No. 3.

Sincerely,

25X1A

George
